PROFILE SUMMARY

Aspiring Software Engineer with strong foundation in Data Structures & Algorithms and hands-on experience in software development. Proficient in C++ and Java Script. Passionate about writing clean, efficient code and constantly improving through learning, building, and collaborating. Seeking opportunities to apply technical skills and contribute effectively to real-world engineering projects.

EDUCATION

Chandigarh engineering college

Bachelor of Technology (Robotics & AI)

Aug 2024 - Jun 2027 (Expected)

CGPA: 7/10

Atal Bihari Vajpayee Govt. Institute of Engineering & Technology

Diploma in Computer Engineering

Aug2022 – Jun 2024

SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL.

Technologies & Tools: ReactJS, Node.js, Express, MongoDB, PostgreSQL, Prisma, Tailwind CSS, VS Code, Git, GitHub.

Domains & Expertise: Back- end Development, Frontend Development.

Soft Skills: Team Collaboration, Problem-Solving, Time Management, Adaptability.

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Operating Systems, Database, Computer Organization, Statistics and Probability, Computer Networks.

PROJECT WORK

Real-Time Collaborative Coding Platform:

- Built a real-time collaborative coding platform supporting multi-user editing and execution in shared rooms.
- Developed a web-based IDE using React and Monaco Editor with live sync, cursor tracking, syntax highlighting, and voice/text chat.
- Implemented a scalable backend with Express and WebSockets for real-time events, room management, JWT authentication, and session control.
- Designed a PostgreSQL data layer to persist users, rooms, chat, code history, and session replays.
- Integrated secure Docker-based code execution with sandboxing, isolation, and strict resource limits.

Personal Knowledge & Task Management System:

- Built a full-stack “Second Brain” application for capturing, organizing, and retrieving notes, tasks, ideas, and references.
- Developed a responsive React frontend with real-time updates, intuitive navigation, and support for tags and linked content.
- Implemented a scalable Node.js + Express backend handling note CRUD, tagging, backlinks, and user-level data isolation.
- Designed a MongoDB schema to store notes, metadata, relationships, and revision history for long-term knowledge retention.
- Secured the platform with JWT-based authentication and authorization supporting multi-device access.

CERTIFICATIONS

- **CompTIA Network+:** Issued by CGC Jhanjeri 
- **Web development cohort:** Issued by 100Xschool 
- **Introduction to MongoDB — MongoDB University**
